## Pakistan Automobile Downshift from the top as prices elevate

## Event

Automobile sales for the month of Jan'22 remained upbeat due to (1) improving economic activity inducing high demand and (2) improving supply chain, with PC\&LCVs increasing by $14 \%$ YoY. However, PC\&LCVs experienced a sequential decline of $18 \%$ MoM. To highlight automobile registered highest ever sales last month in anticipation of tax withdrawn and price increase in Jan'22. This cumulated into 156,764 units sold in 7MFY22, $\uparrow 61 \%$ YoY. Player-wise, HCAR/INDU increased by $66 / 25 \%$ YoY ( $\downarrow / \uparrow 14 / 9 \%$ MoM), whereas sales growth for PSMC remained muted on YoY basis ( $\downarrow 42 \%$ MoM). This translates into cumulative growth of $47 / 42 / 74 \%$ YoY for HCAR/INDU/PSMC for 7MFY22.

## Impact

- Shift in segment mix: The automobile sales, segment-wise was supported by 1300 cc increasing by $36 \%$ YoY in Jan'22, meanwhile sales growth was restricted by 800/1000cc increasing/decreasing by $1 / 3 \%$ YoY. The main driver for growth for 1300 cc was dissipating supply chain issues and better corporate earnings. However market share for 1300cc remained depressed by declining 5ppt on cumulative basis, whereas $1000 / 800 \mathrm{cc}$ improved by $3 / 3$ ppt YoY. On sequential basis sales declined across the board, with $1300 / 1000 / 800$ cc declining by $5 / 37 / 58 \%$ MoM.
- PSMC's periodic downshift: PSMC volumetric sales clocked in at 9,037 units, depicting a muted growth on YoY basis, meanwhile sequentially sales declined by $42 \% \mathrm{MoM}$. To highlight PSMC sold highest ever units last month. Sales for Alto increased by mere 1\% YoY ( $\downarrow 58 \%$ MoM). Whereas sales for Cultus/Bolan decreased by $20 / 3 \%$ YoY. To note zero units of swift were sold in Jan'22 as compared to 364 units SPLY. However increase of sales of WagonR/Ravi provided buffer increasing sales by $17 / 44 \%$ YoY. The price increase due to rupee depreciation and tax-cut withdrawals would keep sales growth depressed. However PSMC is expected to introduce new variants of Swift and Bolan in near term that would provide excitement in demand.
- INDU only player to post sequential growth: INDU sales increased by $25 \%$ to 6,797 units in Jan'22, also depicting sequential growth of $9 \%$. This cumulated sales for INDU in 7MFY22 at 44,869 units (increasing by $42 \%$ YoY). The sales increase was attributed to Corolla+Yaris increasing by $22 \%$ YoY ( $\uparrow 7 \%$ MoM) to 5,528 units in Jan'22. Similarly Fortuner+Hilux sales increased by $36 \%$ YoY ( $\uparrow 19 \% \mathrm{MoM}$ ) to 1,269 units. INDU keeps on consolidating on brand equity and well-positioning of its portfolio keeps its immune to the macro-cycle. We expect INDU to keep posting robust growth and operate at full utilization this year.
- HCAR consolidating on consumer perception: HCAR was able to sell 4,064 units in Jan'22 ( $\uparrow / \downarrow 66 / 14 \%$ YoY/MoM) with sales for Civic+City increasing/decreasing by $77 / 17 \% \mathrm{YoY} / \mathrm{MoM}$. BR-V was able to revive its sales to 418 units ( $\uparrow 8 / 38 \% \mathrm{YoY} / \mathrm{MoM}$ ). This cumulates 34,358 units in 10MMY22 showing growth of $72 \%$ YoY. The new variant of city uplifted the demand for the brand. Now the new variant of civic is expected to be delivered in Jul'22 that may replicate the demand of City's new variant.

## Outlook

- We have an outperform stance on the sector as the increasing demand from (1) growing economic outlook, and (2) curbing CBUs would keep the volume upbeat. However price hike and increase in FED would hamper this growth. We expect total volumetric sales (PC\&LCVs) to hover around 250k units by end of FY22.

Table 01: Automobile Sales for the month of Jan'22

|  | Jan-22 | Jan-21 | YoY | Dec-21 | MoM | 7MFY22 | 7MFY21 | YoY |
